International Aid Transparency Initiative
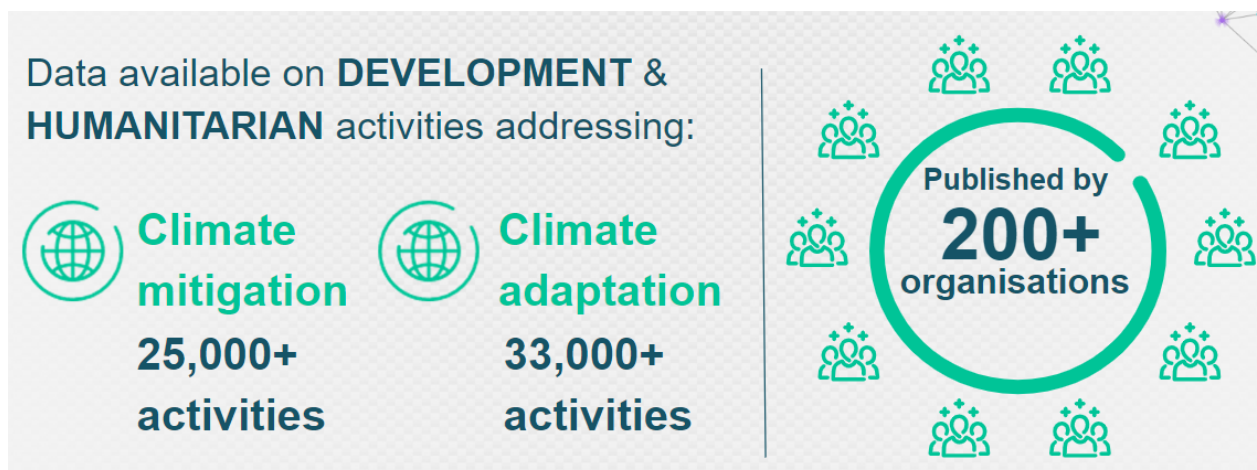

Tracking climate action with IATI

iatistandard.org | 30 November 2023

What is IATI?

The International Aid Transparency Initiative (IATI) is a global initiative to **improve** the **transparency** of development and humanitarian resources and results**.** IATI encourages organisations that address international poverty and crises to publish open data about their funding and activities according to the IATI Standard. This is a set of rules for sharing development and humanitarian data in a way that is accessible and comparable. Once IATI data is published, it is free and open for anyone to access online.

IATI is funded by more than 100 development organisations and a Governing Board of representatives drawn from member organisations. The IATI Secretariat is hosted by UNDP, working closely with technology partners and a wide community of data publishers and users.

What data is available on climate action?

Data available on **DEVELOPMENT** & **HUMANITARIAN** activities addressing:

Climate mitigation 25,000+ activities

Climate adaptation 33,000+ activities

Published by **200+** organisations

As of 30 November 2023, IATI data is available from **219** organisations who marked their development and humanitarian activities as targeting climate change mitigation and/or adaptation. There are **33,340**[1] activities marked as targeting **climate adaptation** and **25,353**[2] marked as targeting **climate mitigation**.

Which organisations publish IATI data?

Donor governments

Multilateral organisations

Development Finance Institutions

Philanthropic Foundations

Fund managers

International non-governmental organisations

National non-governmental organisations

Private sector organisations

Academic, training and research organisations

[2] [Data accessed on 30 November at d-portal.org](d-portal.org)

IATI encourages all organisations working to address international development and humanitarian crises to publish IATI data, and mark those of their activities that are targeting climate action using specific policy markers.

The top ten organisations that have identified their activities as targeting climate change adaptation and/or mitigation[3]	Activities (as of 30 November 2023)
Germany - Ministry for Economic Cooperation and Development	7980
Sweden, through Swedish International Development Cooperation Agency (Sida)	7640
European Commission - International Partnerships	3898
Switzerland - Swiss Agency for Development and Cooperation (SDC)	3253
Finland - Ministry for Foreign Affairs	3158
Food and Agriculture Organization of the United Nations (FAO)	2873
Australia - Department of Foreign Affairs and Trade	1325
Denmark - Ministry of Foreign Affairs, Danida	1200
Norad - Norwegian Agency for Development Cooperation	1184
European Commission - Neighbourhood and Enlargement Negotiations	1122

What types of data can be found?

In addition to policy markers, the IATI Standard enables organisations to publish a wide range of information including financial data, strategic documents, project locations and results achieved.

| Past spending | Future budget plans | Strategic documents | Results | Locations | Sectors |

Start exploring IATI data using our online tools:

- d-portal.org - one of simplest ways of searching IATI data. Here you can search specifically for activities targeting climate mitigation and / or adaptation by selecting them from the filter called 'Policy Marker'.

- County Development Finance Data Tool (CDFD) - great for visualising and analysing development finance published to IATI data by country / region.

- IATI Datastore - undertake more complex searches of IATI data. Query ALL data fields published in the IATI Standard. API available.

For support to publish and/or access IATI data, please reach out to the IATI Secretariat: support@iatistandard.org.
